

Pediredla Sai Lokesh

sailokesh1920@gmail.com — +91-7416751547 — [GitHub](#) — [LinkedIn](#)

Skills

Languages	Java, JavaScript, Python, SQL
Frontend	React.js, HTML, CSS, Tailwind CSS
Backend	Fastify, REST APIs, JWT Authentication
Database	PostgreSQL
AI/ML	TensorFlow, Keras, Scikit-learn, Pandas, NumPy
Core Concepts	Data Structures and Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
Tools	Git, GitHub, VS Code, Postman, Figma, Vercel, Render

Education

GITAM University, Visakhapatnam	Expected 2027
B.Tech in Computer Science (Data Science)	
Intermediate (MPC)	84.3%
SSC	98.3%

Experience

Data Science Intern — SkillCraft Technology

- Analyzed and preprocessed structured datasets using Pandas and NumPy for machine learning workflows.
- Assisted in training and evaluating machine learning models using accuracy and loss metrics.
- Performed exploratory data analysis and feature engineering to improve model performance.
- Worked with data cleaning, transformation, and visualization techniques on structured datasets.

UI/UX Intern — InternPe

- Designed mobile and web UI prototypes using Figma for responsive applications.
- Improved usability through iterative design processes and prototype testing.
- Created wireframes and high-fidelity interfaces focused on intuitive user experiences.
- Applied typography, spacing, color consistency, and visual hierarchy principles.

Machine Learning Intern — Launched Global

- Implemented supervised learning algorithms for prediction-based applications.
- Compared and evaluated machine learning models using standard evaluation metrics.
- Worked on preprocessing, optimization, and validation workflows for ML systems.

Projects

CineVerse — Movie Recommendation System	Python, TensorFlow, Keras, Streamlit
- Built a deep learning-based movie recommendation system using embedding layers to model user preferences. - Processed, transformed, and encoded movie datasets for improved recommendation accuracy. - Developed and deployed an interactive Streamlit application for real-time movie recommendations. - Integrated recommendation logic to generate personalized movie suggestions using similarity techniques. - Implemented user-movie relationship modeling for better prediction quality and scalability. - Live Demo: CineVerse Deployment	

Food Delivery App UI/UX Design	Figma
- Designed intuitive mobile application screens and interactive UI prototypes. - Applied visual hierarchy, spacing, typography, and reusable component principles. - Structured complete user flow including login, navigation, cart, and checkout systems. - Created responsive UI layouts focused on accessibility and smooth user interaction. - Figma Design: View Design	

React Web Application	React.js, JavaScript
- Developed a responsive web application using reusable React components. - Implemented dynamic form handling and client-side validation techniques. - Improved scalability and maintainability through modular component architecture. - Built structured UI layouts with responsive design principles and reusable logic.	

Certifications

- Data Science Internship — SkillCraft Technology
- UI/UX Internship — InternPe
- Machine Learning Internship — Launched Global
